DigiTEX 2nd TPM

On September 17th, DigiTEX partners met, virtually, for a **project follow-up** session.

During the meeting, the project coordinator, INCDTP, presented **general guidelines** and adaptations regarding the COVID-19 current situation as well as **implementation aspects** to take into account by all partners during the project execution.

Secondly, the partners in charge of the **communication and quality assessment** of the Digitex project introduced their, **indications for an accurate dissemination of the project, a profitable implementation and some results about these topics emerged** during the first 6 months of the project.

The partnership debated about the IO2, an E-book called '*Medical, sensorial and protective textiles development in the context of the European economy and digitalization*'; **the structure it will follow and the responsibles for each chapter**.

DigiTex partners during the meeting

The aim of the project is to **support innovative approaches and digital learning technologies to accelerate innovation, teaching and learning in the field of medical, protective, sensorial and smart textiles design testing and manufacturing of the innovative advanced products for healthcare** in the context of the digital economy.

The next Transnational Project Meeting is set on February 2022 in Terrassa.

CURRENT ADVANCES

During the last 6 months, the consortium has advanced on the first Intellectual outputs of the project.

The **e-learning platform** that will enable the course management system (CMS) for interactive learning tools **is being developed** by INCDTP and its testing will start in the upcoming months.

The **macrostructure of the IO2**, the **Book** of '*Medical, sensorial and protective textiles development in the context of the European economy and digitalization*' **is already defined**, according several relevant topics for the project. The consortium made a repartition giving each partner some chapters to develop and allowing the advance of the IO in parallel.

The IO3, the **database** development is currently **under definition** by AEI Tèxtils.

The outputs **4 - book of best practices , 5 - virtual tools for training and 6 - the toolkit, have just started** and during the following months
